STORAGE 1: 3000 gal. lined Galvalume
STORAGE 2: 5000 gal. lined Galvalume
PUMP 1: 1.0 hp. sub.
PUMP 2: 0.75 hp sub.
Landscape soil

**STRATEGY**
Split system. The landscape in the courtyard was designed with the water demand in mind. The fruiting trees, shrubs and grape vines are irrigated with this isolated 5000 gal. pressurized system. The 3000 gal. pressurized system was designed to meet the demands of the vegetable garden only. The balance of the exclusively native species landscape is irrigated with municipal water for a two year establishment period only.
